

Antoni Gapiński | Frontend Developer

gapinski02@gmail.com | 664 598 317 | Koszalin, Poland

Education: Bachelor's Degree in Computer Science (*weekends, full-time availability*)
Politechnika Koszalińska | (2024 – Present)

Profile

A dedicated Frontend Developer with over 1 year of web application development experience. Proficient in React, TypeScript, and Tailwind CSS. Experienced in building responsive applications and integrating APIs. Familiar with managing navigation and routing with React Router and state management with Redux. Strong problem-solving skills with the ability to work independently using technical documentation. Passionate about continuous learning and staying updated with the latest frontend technologies.

Experience

Frontend Developer

EverythingShop (01.2025 to 02.2025)

- Developing an e-commerce web application using **React, Typescript & Tailwind** ensuring seamless integration of product data with the FakeStoreApi.
- Implementing client-side routing with **React Router**, enabling navigation between categories and cart, enabling dynamic navigation between product pages.
- Managing API requests with **React Query**, optimizing data fetching and state synchronization for improved performance.
- Building a global cart state using **Context API** and a **custom hook**, allowing real-time updates to product quantities, total price, and discount application.
- Enabling product **sorting and filtering**, allowing users to sort items by price (ascending/descending) or alphabetically for a better browsing experience.
- Handling **pagination** for product listings, improving user navigation and performance when browsing large inventories.
- Finalizing transactions by returning an array of purchased products, ensuring accurate order processing.

Frontend Developer

Kmtech-fix (11.2024 to 12.2024)

- Designing a web application according to client guidelines in **Figma**.
- Implementation of custom reusable responsive, accessible UI components in **React & Typescript**, significantly enhancing user experience across devices.
- Implementing important for user experience animations with **Motion**.
- Validation of the correctness of the data entered into the contact form with **Zod**
- Capture information entered into a contact form and deliver it to the customer's email using **EmailUS**.

Frontend Developer

Hoodmood (02.2024 to 03.2024)

- Developed a fully responsive single-page application for a real client using **HTML, CSS & Javascript**, incorporating multiple interactive components to enhance user engagement.
- Implemented dynamic UI elements, including an accordion, instructor cards with modals, and a sliding graphic for small screens.
- Created a category-based dynamic pricing list, allowing users to filter and view class prices, solving a key challenge in the project.
- Built a contact form with JavaScript validation using regular expressions, ensuring accurate data entry before submission.
- Integrated EmailUS for handling form submissions, delivering messages directly to the client's email.
- Styled the application using **SCSS**, enhancing maintainability and enabling smooth animations for improved user experience.
- Displayed a confirmation modal after form submission, providing users with immediate feedback.

Skills

Frontend development:

- **Proficient in:** React, TypeScript, Tailwind CSS, JavaScript, HTML, CSS.
- **Familiar with:** Redux, React Router, Framer Motion, Figma, Zod, React Hook Form.
- Ability to work with technical documentation.

Soft skills:

- English – B2.
- Polish – Native.
- Willingness to learn and self-reliance.
- Communication and teamwork.
